

**Safety Attribute Inspection (SAI) Data Collection Tool
1.3.7 Outsource Organization (AW)****ELEMENT SUMMARY INFORMATION****Purpose of This Element** (Certificate Holder's responsibility):

- To ensure when making arrangements with other persons to perform maintenance, preventive maintenance, or alterations of its aircraft, including airframes, aircraft engines, propellers, appliances, emergency equipment, and parts thereof, the performance is in accordance with its continuous airworthiness maintenance program (CAMP), maintenance manual and the regulations of Title 14 of the Code of Federal Regulations (14 CFR).

Objective (FAA oversight responsibility):

- To determine if the certificate holder's Outsource Organization process meets all applicable requirements of 14 CFR and Federal Aviation Administration (FAA) policies.
- To determine if the certificate holder's Outsource Organization process incorporates the system safety attributes.
- To identify any shortfalls in the certificate holder's Outsource Organization process.

SAI SECTION 1 – PROCEDURES ATTRIBUTE

Objective: Procedures, instructions, and information contained in the certificate holder's manual are documented methods for accomplishing a process. Policies contained in the certificate holder's manual should establish the certificate holder's compliance posture. Policies may not be stand-alone statements but may be imbedded within procedures, instructions, or information regarding a particular regulatory requirement. The questions in this section of the data collection tool (DCT) are designed to assist the inspector in determining if the certificate holder's manual has documented or prescribed methods of accomplishing the process requirements that provide answers to the associated questions regarding who, what, when, where and how. This section contains policy questions, procedural questions, and instructional or informational questions pertaining to various types of certificate holder requirements such as actions, prohibitions, or resources (i.e., personnel, facilities, equipment, technical data, etc.).

Tasks

To meet this objective, the inspector must accomplish the following tasks:

- 1 Review the information listed in the supplemental information section of this DCT.
- 2 Review the duties and responsibilities for management and other personnel identified by the certificate holder who accomplish the Outsource Organization process.
- 3 Review the certificate holder's manual to ensure that it contains policies, procedures, instructions, and information necessary for the Outsource Organization process.

Questions

To meet this objective, the inspector must answer the following questions:

1. Does the content of the certificate holder's manual meet the specific regulatory and FAA policy requirements for an Outsource Organization process?
 - 1.1 Does the certificate holder's manual contain general policies for the Outsource Organization process that comply with the SRRs?
SRRs: 121.135(b)(1); 121.363(b); 121.365(a); 121.365(b); 121.365(c); 121.371(a); 121.371(b); 121.371(c); 121.371(d); 121.373(a); 121.375; 121.377; 121.378(a); 121.379(a); 121.457(b); 121.703(g); 121.709(a); D.091

SAI SECTION 2 – CONTROLS ATTRIBUTE

Objective: Controls are checks and restraints designed into a process to ensure a desired result. The questions in this section of the DCT are designed to assist the inspector in determining if checks and restraints are designed into the process to ensure the desired result is achieved. Controls should be written into the manual system to ensure that the most important manual policies, procedures, or instructions and information will be followed.

Controls may be in the form of administrative controls, which are secondary or supplemental written procedures. Like written procedures, administrative controls also need to provide answers to questions regarding who, what, when, where and how. Controls may also be in the form of engineered controls, such as automated features or mechanical actions or devices (i.e., safety devices, warning devices, etc.).

Tasks

To meet this objective, the inspector must accomplish the following tasks:

- 1 Review the control questions below.
- 2 Review the certificate holder's policies, procedures, instructions, and information to gain an understanding of the controls that it has documented.

Questions

To meet this objective, the inspector must answer the following questions:

2. Are the following controls built into the Outsource Organization process:

2.1 Is there a control in place to ensure that the certificate holder's Continuing Analysis and Surveillance System would detect and correct deficiencies in programs carried out by the outsource organization?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.2 Is there a control in place to ensure that the certificate holder's aircraft, including airframes, engines, propellers, appliances, emergency equipment or parts thereof, released to service by the maintenance provider, are maintained in an airworthy condition for operation under 14 CFR 121?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.3 Is there a control in place to ensure that competent personnel are provided by the maintenance provider for the proper performance of maintenance, preventive maintenance, and alterations on the certificate holder's aircraft, airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.4 Is there a control in place to ensure that adequate facilities are provided by the maintenance provider for the proper performance of maintenance, preventive maintenance, and alterations on the certificate holder's airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.5 Is there a control in place to ensure that adequate equipment is provided by the maintenance provider for the proper performance of maintenance, preventive maintenance, and alterations on the certificate holder's aircraft, including airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.6 Is there a control in place to ensure that the maintenance provider was appropriately rated/authorized for the maintenance, preventive maintenance, or alterations it performed on the certificate holder's aircraft, airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

2.7 Is there a control in place to ensure that current technical and administrative material for the proper performance of maintenance, preventive maintenance, and alterations of the certificate holder's aircraft, airframes, engines, propellers, appliances, emergency equipment, or parts thereof, is accessible to outsource provider personnel while performing their assigned duties?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.8 Does the certificate holder have a documented method for assessing the impact of any changes made to the controls in the Outsource Organization process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

SAI SECTION 3 – PROCESS MEASUREMENT ATTRIBUTE

Objective: Process measurements are used by the certificate holder to measure and assess its processes, to identify and correct problems or potential problems, and to make improvements to the processes. The questions in this section of the DCT are designed to assist the inspector in determining if the certificate holder measures or assesses information to identify, analyze, and document potential problems with the process. Process measurements are a certificate holder's internal evaluation or auditing of the most important policies, procedures, or instructions and information associated with an element.

To prevent the duplication of work, process measurements are most commonly addressed through a combination of auditing features contained in both the certificate holder's safety program/internal evaluation program (for operations and cabin safety–related issues) and the auditing function of the Continuous Analysis and Surveillance System (for airworthiness or maintenance/inspection–related issues). The director of safety and the quality assurance department often work together to accomplish this function for the certificate holder. This approach requires amendment of the safety program/internal evaluation program audit forms or checklists and the Continuous Analysis and Surveillance System audit forms or checklists to include the specific process measurements for each element.

Tasks

To meet this objective, the inspector must accomplish the following tasks:

- 1 Review the process measurement questions below.
- 2 Review the certificate holder's policies, procedures, instructions, and information to gain an understanding of the process measurements that it has documented.

Questions

To meet this objective, the inspector must answer the following questions:

3. Does the certificate holder's Outsource Organization process include the following process measurements:

3.1 Process measurements that would reveal if the certificate holder's Continuing Analysis and Surveillance System failed to detect and correct deficiencies in programs carried out by the outsource organization?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.2 Process measurements that would reveal if the certificate holder's aircraft including airframes, engines, propellers, appliances, emergency equipment, or parts thereof, were released to service by the maintenance provider in other than an airworthy condition for operation under 14 CFR 121?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.3 Process measurements that would reveal if competent personnel were not provided by the maintenance provider for the proper performance of maintenance, preventive maintenance, and alterations on the certificate holder's aircraft, airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.4 Process measurements that would reveal if adequate facilities were not provided by the maintenance provider for the proper performance of maintenance, preventive maintenance, and alterations on the Certificate Holder's airframes, engines, propellers, appliances, emergency equipment or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.5 Process measurements that would reveal if adequate equipment was not provided by the maintenance provider for the proper	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

	performance of maintenance, preventive maintenance, and alterations on the certificate holder's aircraft including airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	
3.6	Process measurements that would reveal if the maintenance provider was not appropriately rated/authorized for the maintenance, preventive maintenance, or alterations it performed on the certificate holder's aircraft, airframes, engines, propellers, appliances, emergency equipment, or parts thereof?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.7	Process measurements that would reveal if current technical and administrative material for the proper performance of maintenance, preventive maintenance, and alterations of the certificate holder's aircraft, airframes, engines, propellers, appliances, emergency equipment, or parts thereof, was not accessible to outsource provider personnel while performing their assigned duties?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.8	Does the certificate holder document its process measurement methods and results?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.9	Does the organization that conducts the process measurements have direct access to the person with responsibility for the Outsource Organization process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

1. No process measurements specified.	
2. Documentation for the process measurements does not identify (who, what, when, where, how).	
3. Inability to identify negative findings.	
4. No provisions for implementing corrective actions.	
5. Ineffective follow-up to determine effectiveness of corrective actions.	
6. Resources requirements (personnel, facilities, equipment, technical data).	
7. Other.	

SAI SECTION 4 – INTERFACES ATTRIBUTE

Objective: Interfaces are used by the certificate holder to identify and manage the interactions between processes. The questions in this section of the DCT are designed to assist the inspector in determining whether or not interactions between the policies, procedures, or instructions and information associated with other independent processes within the certificate holder's organization are documented. Written policies, procedures, or instructions and information that are interrelated and located in different manuals within the certificate holder's manual system must be consistent and complement each other. For the interfaces to be effectively managed, it is not only important to identify what the interfaces are, but it is imperative to document the specific location of the interfaces within the certificate holder's manual system.

Tasks

To meet this objective, the inspector must accomplish the following tasks:

- 1 Review the interfaces associated with the Outsource Organization process that have been identified along with the individual questions in the Section 1, Procedures, of this DCT.
- 2 Review the certificate holder's policies, procedures, instructions, and information to gain an understanding of the interfaces that it has documented.

Questions

To meet this objective, the inspector must answer the following questions:

Note: The design job task items (JTIs) displayed with the questions in Section 1, Procedures of this DCT, identify the potential interfaces (by element number) for this element.

4. Does the certificate holder's manual:	
4.1 Properly address the interfaces that are identified along with the questions in Section 1, Procedures of this DCT.	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
4.2 Document a method for assessing the impact of any changes to the associated interfaces within the Outsource Organization process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

SAI SECTION 5 – MANAGEMENT RESPONSIBILITY & AUTHORITY ATTRIBUTE

Objective: The questions in this section of the DCT address the responsibility and authority of the process. They are designed to assist the inspector in determining if there is a clearly identifiable, qualified, and knowledgeable person who is responsible for the process, is answerable for the quality of the process, and has the authority to establish and modify the process. (The person with the authority may or may not be the person with the responsibility.)

Tasks

To meet this objective, the inspector must accomplish the following tasks:

- 1 Identify the person who has overall responsibility for the Outsource Organization process.
- 2 Identify the person who has overall authority for the Outsource Organization process.
- 3 Review the duties and responsibilities of the person(s), documented in the certificate holder's manual.
- 4 Review the appropriate organizational chart.

Questions

To meet this objective, the inspector must answer the following questions:

5. Are the following aspects of the Management Responsibility and Authority Attribute addressed in the Outsource Organization process:

5.1 Does the certificate holder's manual clearly identify who is responsible for the quality of the Outsource Organization process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain Name/Title: <input type="text"/>
